

Pet Urine Smell and Other Undesirable Household Odors

How do you remove those pet and stinky smells from various areas and surfaces? My clients with rental properties who face the problem often suggest a number of solutions (no pun intended). Antibacterial, concentrate odor removers such as OdoBan® or Zep Odorstroyer Plus® are available in many retail stores (Wal-Mart, Home Depot, O'Reilly Auto Parts, etc), and enzyme- based products such as Stink Free® or OdorZyme® are usually available online. A search for "pet odor removal" in a search engine such as Google® will yield hundreds of results. A product some have used successfully on concrete and duct work is Namco's Liquid Alive Bacteria Enzyme® generally available from Home Depot or Lowe's tool rental sections or online at NAMCO.
